EXTENSION(S)

An inclusive term describing ANY feature that can be installed into DotNetNuke.

Includes: designs, apps, modules, providers, and more.

DotNetNuke Corp. Confidential © 2013 All rights reserved.

Module

A self-contained application that provides enhanced, alternative, or new content editing functionality.

Examples: html, blog, survey, forums, reports, and more

FUN FACT: Pages house one or more modules

DotNetNuke Corp. Confidential © 2013 All rights reserved.

Skin

A term that describes the design that can be applied to one or more web pages on your website.

FUN FACT: You can have as many layouts as you want!

DotNetNuke Corp. Confidential © 2013 All rights reserved.

CONTAINER

A term that describes the design that can be applied to one or more modules on your web page.

FUN FACT: Every module on a page can look different!

DotNetNuke Corp. Confidential © 2013 All rights reserved.

Skin Package

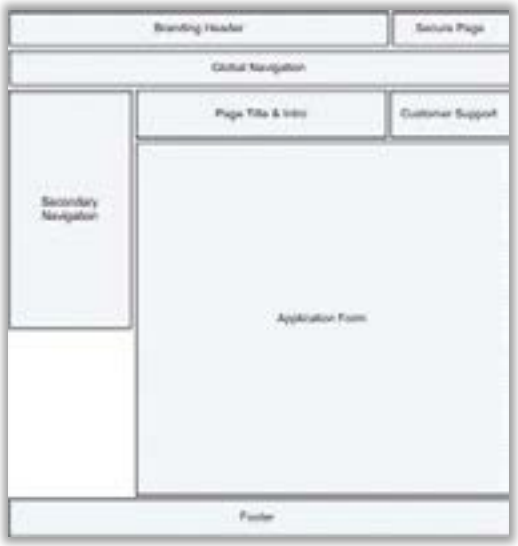
A term that describes the installation file that contains one or more skins and containers.

DotNetNuke Corp. Confidential © 2013 All rights reserved.

PANE

An area on a skin layout where modules can be added to the page by content editors.

Also known as “skin pane” or “content pane.”



FUN FACT: Designers can specify unlimited panes.
